## Dr. Lindo returns to RGH

**Dr. Hersell Lindo (left) is welcomed by RGH Chief Operating Officer Tillman Mears. The announcement was made Thursday afternoon (Sept. 28) although it had been intended to have been made Thursday morning. Dr. Lindo needed to delay the photo opportunity because he was delivering a baby Thursday morning at a hospital in Ocala.**

### **Story and Photo**

**WILLISTON --** Dr. Hersell Lindo, M.D., has returned to serve patients at the rural health clinic located on the campus of Regional General Hospital in Williston.

**Dr. Lindo is available each Friday from 8 a.m. to 4 p.m. and each Saturday from 9 a.m. to 2 p.m. in Williston at RGH. He is a specialist in obstetrics and gynecology.**

**He is resuming his practice in Williston in addition to his Ocala office hours, effective this Friday (Oct. 6). Call 352-330-6110.**

Dr. Lindo provides a wide range of services, including as a practitioner of general medicine. In regard to the rural health medical clinic services for women at the Williston facility, there are a wide range of comprehensive screenings, including cancer screening of the breast, cervical area, colon/prostate and for uterine cancer.

Not only is Dr. Lindo screening for cancer, but he is providing treatment that includes surgery and chemo-therapy.

In regard to other medical issues facing women that Dr. Lindo can help them with are: menopause management; annual wellness examinations; and family planning services.

As for family planning, this can include the surgical action needed for an inter-uterine

device, and there are laparoscopic surgeries that can be performed through a day visit rather than having to stay overnight at a hospital.

Dr. Lindo also can provide diabetes screening and blood pressure screening as well as treatments for those medical issues. There are vaccination services available at the rural health clinic as well.

Dr. Lindo graduated from the University of the West Indies in 1975. He continued his post graduate work at Columbia University and affiliated hospitals.

He is board certified and is a fellow with the American College of Obstetricians and Gynecologists, as well as being a board-certified doctor and fellow of the Society of Obstetricians and Gynaecologists (British spelling) of Canada.
